ABOUT ME

I am a self-taught software Engineer who fell in love with coding in the summer of 2022. I decided to further my skills in software development by enrolling in Rutgers Full Stack Coding Bootcamp. I look forward to applying my skills in a Software Engineering position.

SKILLS

Computer Science, Object Oriented Programming, Frontend, Backend, Git, Github, Visual Studio Code, Web Development, Handlebars, HTTP Methods, NPM, Relational Database Management System (RDBMS), Responsive Web Design, Communication.

PROJECTS

Game Review

- FullStack **REST API** Application deployed to **Heroku**.
- Created using **Javascript**, **Express**, **NodeJs**.
- **MySQL** was used in combination with an **Object Relational Tool** (**ORM**), **Sequelize**, in order to interact with **databases**.
- This app allows any user to create an account and add reviews to any video game.
- Sequelize **CRUD** (Create, Read, Update, Delete) operations were used to manipulate databases.
- File structure based on **MVC** design pattern

Music Playlist

- Web App designed to search for music and save them in a playlist.
- This app was created with **HTML**, **CSS**, **Bulma**, **Jquery** and **Javascript**.
- **AJAX** calls to **Third Party Web API**'s from Deezer and Itunes were implemented in order to get music data
- **DOM** manipulation was used to display music data after an AJAX call was made
- Playlist creation made possible through **Local Storage**.

Weather Forecast

- Web app created with **HTML**, **Javascript**, **CSS**, and **Jquery**
- Intergrated with a **3rd Party API** in order extract and apply weather data
- DOM manipulation used to display data from Third Party API
- **Responsive Design** was implemented using **Bootstrap**

WORK EXPERIENCE

Wordpress Crypto Content Writer

Self-Employed: April 2022 –present
